

Research Associate, Cancer Immunotherapy
Job code 230LG

Description

Fate Therapeutics is currently seeking a motivated, conscientious, and talented individual with experience in cell culturing, flow cytometry, cloning, and gene expression to assist our immunology teams in performing and analyzing experiments involving *in vitro*, *ex vivo*, and *in vivo* analyses of primary and iPSC-derived CAR-T cells. This is a full-time position located at the Company's corporate headquarters in San Diego.

Responsibilities include

- *In vitro/ex vivo* cellular assays utilizing flow cytometry, including the phenotypic and functional characterization of various leukocytes, cultured cells, and tumor cell lines
- Genetic engineering of primary and/or iPSC-derived CAR-T cells and tumor cell lines
- ELISA, multiplex, or MSD analyses of cytokine/chemokine expression
- Handling and processing of animal tissue, including, but not limited to, blood, spleen, lymph node, bone marrow, liver, and solid tumor for flow cytometry, cytokine/chemokine expression, gene expression, and/or histology
- Data collection, analysis, and detailed record keeping
- Presentation of data to immunology groups and larger program-specific teams

Requirements

- B.S. / M.S. degree in Cell Biology, Immunology or other related fields and 3+ years of laboratory experience in an academic, biotechnology, or pharmaceutical setting
- Coordination with multiple Scientists across programs for scheduling and execution of experiments
- Experience with multi-color flow cytometry
- Experience with genetic modification of cell lines is highly desirable
- Experience with cell culturing, ideally with various assays for primary T and CAR-T cell effector function including target cell killing, cytokine production, and expansion
- Excellent communication, organization, and data analysis skills are a must
- Positive outlook, willingness to learn and contribute, and a team-oriented attitude

Working conditions and physical requirements

- Will require working with cells and cell lines of human and/or animal origin
- May require working with and/or handling of rodents
- Occasional weekend and/or evening hours required
- 100% on site work at corporate headquarters in San Diego, CA

The preceding job description indicates the general nature and level of work performed by employees within this classification. Additional and incidental duties related to the primary duties may be required from time to time.

For consideration send cover letter and curriculum vitae to: careers@fatetherapeutics.com and reference 230LG.

About Fate Therapeutics, Inc.

Fate Therapeutics is a clinical-stage biopharmaceutical company dedicated to the development of first-in-class cellular immunotherapies for cancer and immune disorders. The Company is pioneering the development of off-the-shelf cell products using its proprietary induced pluripotent stem cell (iPSC) product platform. The Company's immuno-oncology pipeline is comprised of FATE-NK100, a donor-derived natural killer (NK) cell cancer immunotherapy that is currently being evaluated in three Phase 1 clinical trials, as well as iPSC-derived NK cell and T-cell immunotherapies, with a focus on developing augmented cell products intended to synergize with checkpoint inhibitor and monoclonal antibody therapies and to target tumor-specific antigens. The Company's immuno-regulatory pipeline includes ProTmune™, a next-generation donor cell graft that is currently being evaluated in a Phase 2 clinical trial for the prevention of graft-versus-host disease, and a myeloid-derived suppressor cell immunotherapy for promoting immune tolerance in patients with immune disorders. Fate Therapeutics is headquartered in San Diego, CA. For more information, please visit www.fatetherapeutics.com.
